

## Product Information

# TIB Additive F Neutraliser

Product number 303669

# TIBCHEMICALS

### PRODUCT DESCRIPTION

**TIB Additive F Neutraliser** is an acid neutralizing additive that controls the pH value of flux baths.

**TIB Additive F Neutraliser** can be added directly to the flux bath, where it converts excess acid into new flux.

**TIB Additive F Neutraliser** eliminates the need to add ammonia to the flux bath.

**TIB Additive F Neutraliser** does not interfere with the flux process and is compatible with all fluxes.

### FEATURES AND BENEFITS

- Easy control of the pH
- Free-flowing powder
- No ammonia
- Helps reduce the ash and hard zinc accumulation

### PROPERTIES

Appearance	White powder
pH (in solution)	5,5

### PACKAGING

- 25 kg Bags

### CUSTOMS TARIFF NUMBER

39100000

### STORAGE

**TIB Additive H Neutraliser** has a shelf life of approximately 1 year in sealed containers. The temperature should not be allowed to drop below 0°.

### APPLICATION INFORMATION

Ideally, you should operate your Flux at a pH of 4 to 5.5.

**TIB Additive F Neutraliser** should be added evenly over the entire length of the flux bath for optimal effect

#### Additions

Additional additions of **TIB Additive F Neutraliser** should only be made if necessary.

### HANDLING, HEALTH AND SAFETY

Suitable protective clothing should be worn when handling the product for further information refer to the relevant MSDS
