

Product Information

# TIB Clean H 501

Product number 303685

## TIBCHEMICALS

### PRODUCT DESCRIPTION

**TIB Clean H 501** is a concentrated regeneration additive based on a mix of Inorganic acids, special Inhibitors for use in conjunction with **TIB Clean H 500** in the Galvanising industry.

**TIB Clean H 500** controls and hinders the problem of floating contamination in **TIB Clean H500** cleaning Baths

**TIB Clean H 501** is extremely economical – it increases the bath life & reduces the need to replace older baths of **TIB Clean H500**

### FETURES AND BENEFITS

- ◆ Concentrated Liquid
- ◆ Controls floating contaminants
- ◆ Easy handling
- ◆ Low operating concentration
- ◆ Prolongs bath life's

### PROPERTIES

Density	1,4 g/ml
Appearance	Clear Liquid
pH in solution	Ca. 1.5 - 2
Solubility	Fully miscible

### PACKAGING

- ◆ 205L Barrels of 240 kg
- ◆ 1000 L IBC of 1200 kg

### STORAGE

**TIB Clean H 501** has a shelf life of approximately 6 months if stored in sealed containers in a cool dry place

### CUSTOMS TARIFF NUMBER

3810 9090

### APPLICATION INFORMATION

#### Typical operating parameters

**TIB Clean H501** is used together with **TIB Clean H 500** at a ratio of 1:1.

#### Make up of a new tank:

**TIB Clean H 501** is not suitable for the makeup of a new bath

#### Testing and control

Regular testing of the pH & Acid concentrations should be carried out, please refer to the TIB's analytical methods for Hot-dip Galvanisers for an appropriate method.

#### Additions

**TIB Clean H 501** is used in conjunction with **TIB Clean H 500** if required due to Floating contamination on the surface of the bath

### HANDLING, HEALTH AND SAFETY

Suitable protective clothing should be worn when handling the product for further information refer to the relevant MSDS
